

So You Think the Big Bad Uranus-Pluto Square is Over?

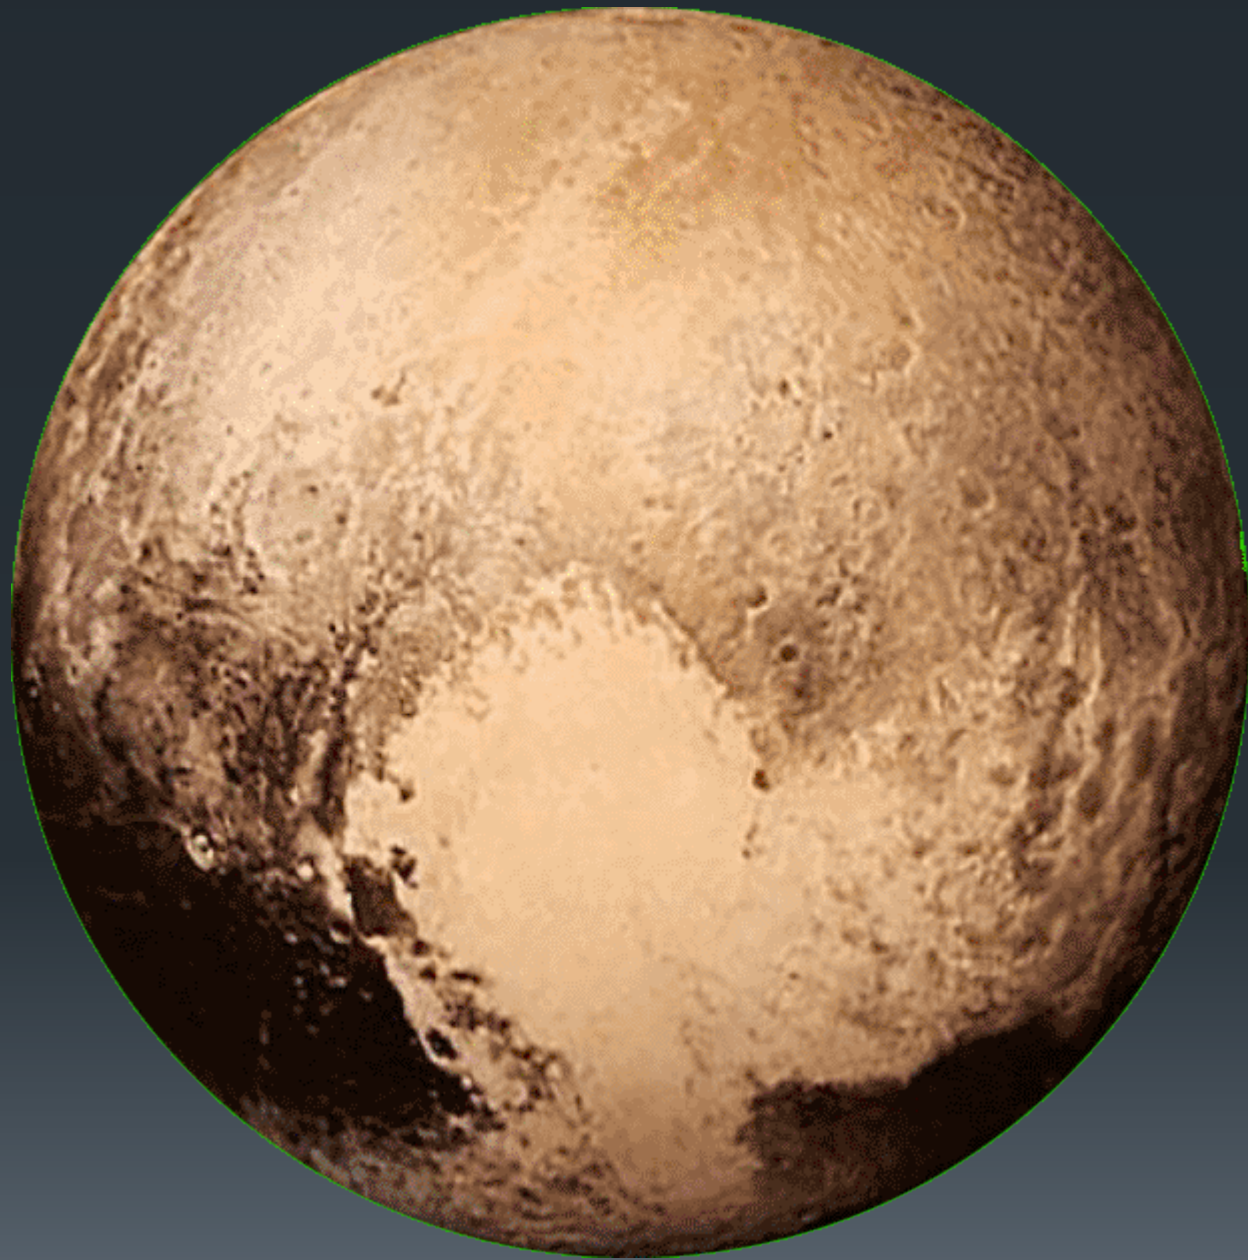

Why Astrologers Need to Know
About Eris and Haumea

Sue Kientz

I'm not alone out here!

Pluto – Indispensable, Right?

- There are MORE “Plutos” out in Pluto’s Realm
- It was right to identify Pluto as Different
- Pluto is the largest member of an important planetary community: The Kuiper Bodies
- Our charts should probably include large members from each of these solar system sections:
 - INNER BODIES
 - ASTEROIDS
 - GAS/ICE GIANTS
 - KUIPERS
 - And SUN and our MOON, of course

How to Approach Kuipers?

- Kuiper Belt Objects have erratic orbits
- Their orbits are sculpted and refined by their Gas/Ice Giant neighbors
- The Social Planets Jupiter, Saturn, Uranus, and Neptune have pushed and pulled their smaller denser neighbors into stable orbits
- Resonances give supporting clues to new planets' meanings, some of which are only numbered and not named
- Even when planets have mythological names, those myths can mythlead us

How Do Myths Mythlead?

- How do you get freedom, independence, machines, technology, and the Industrial Revolution out of the story of a castrated father-god? Yet that's the myth of URANUS
- Where is conservatism, sobriety, industriousness, and the drive to build lasting structures in the story of another father-god, one who swallowed all his children? Kronos's vomiting up a stone also doesn't help with understanding his Roman counterpart SATURN's meaning
- You can't use all of a planet's name's myth in most cases. They are a departure point at best.

The Seed Myths

- **ERIS** is an outcast, excluded from/by Others. Despite being an Olympian goddess, she's "not invited to the wedding," an important community event.
- **MAKEMAKE** – Easter Island creator god, bird god
- **HAUMEA** – Hawai'ian goddess of childbirth. Various parts of her body are cut off and become children.
- **ORCUS** – Another name for Pluto, god of underworld
- **QUAOAR** – Creator god of Tongva Indians of Los Angeles. Quaoar sang and danced the world into existence.
- **VARUNA** – Vedic god who disliked oath-breakers
- **SEDNA** – Inuit goddess of the sea. She was pushed out of a canoe by her father, who then cut her fingers off.
- **IXION** – Brazen king who broke every social norm; even dared to insult Zeus by attempting to rape Hera

In Resonance with the Big Guys

- In *MORE PLUTOS*, I explain how each Kuiper is in resonance
- For example, Pluto is in 3:2 resonance with Neptune. For every 3 times Neptune orbits the Sun, Pluto orbits twice
- Significance? Pluto's control techniques are to threaten, to coerce, to manipulate – all deception! Pluto doesn't want you dead, just pliable, controllable, unaware of the coercion.
- **Haumea**, the fourth largest Kuiper, is most closely resonant with Jupiter. Haumea follows through, in a BIG way (Jupiter). Haumea is Pluto with no qualms. Haumea makes sure you CHANGE your ways/mind, even to the ruthless point of killing.
- **Eris**, second in size to Pluto, is closely resonant with Saturn. Hold off on the Xena Warrior Princess meaning, as this body does not promote/augment violence, even for “right.” Eris represents our ability to connect with Others who aren't friendly, welcoming, familiar. Eris is the non-Self we usually fear.

Metaphors Be With Us

- If the Gas Giants represent Society...
 - JUPITER: Travel, fun times, conviviality
 - SATURN: Work, career, parenting
 - URANUS: Higher mind, technology, invention
 - NEPTUNE: The Spiritual, the interconnectedness of All
- ... the Kuipers are OUTSIDE of that Society.
 - For example, Neptune's "ALL" too often excludes the homeless, the terrorists, the mentally ill. Those people aren't allowed in the Yoga Room for meditation and Om-ing.
 - The Bible's "Thou Shalt Not Kill" was meant for the Israelites only. The Chosen People were allowed to kill the Babylonians, worshippers of Baal, and any other threatening non-Jews
- The Closer Kuipers around Pluto's orbit represent those marginalized by society, who are fighting to get in
- The Farther Kuipers like Eris represent the vast number of Others who have given up or have accepted their Otherness

Examples of Outsider Communities

- **The Mafia** – community operating outside society, trying to bring some kind of “order” or protection to their own
 - Headed by a **PLUTO**- type “Godfather”
 - Supported by **HAUMEA**-like hitmen (Pluto doesn’t do dirtywork)
 - Other Kuipers representative of supporting roles
 - **ORCUS** – **SATURN resonant** – orderly-minded; those who make/implement “RULES” to enforce order
 - **IXION** – at **JUPITER/SATURN nexus point** – conflicted, bucks system; others who break those “RULES” at the behest of a Godfather
 - **VARUNA** – **URANUS/JUPITER resonant** – creative ability; those who lie in order to create a “controlled” reality
 - **MAKEMAKE** – at sweet spot of **SATURN/JUPITER/URANUS resonance** – the brains needed for more complicated endeavors

Outsider Communities (continued)

- Plenty of other “underground” communities fit this scheme:
 - **Street gangs**, bonded together by street location or race
 - **Prison gangs**, similar to street gangs, loyal to a particular inmate
 - **Hitler’s governing inner circle** – Hitler and cohorts made “new rules” as soon as in power, to control the German people who had no clue of Hitler’s overall sociopathic plans
 - **Warren Jeff’s Fundamentalist LDS cult** – Authorities point out the Jeff’s organization is all about money, sex, and power
- All are negative Outsider Communities interacting with (or rejecting) a benign or positive Central Community
- From Pluto, the Solar System is a jewel, ripe for the taking
 - Will your power play protect, cradle, nurture this precious gift?
 - Or are you going to use and abuse its gifts?

Outsider Communities (continued)

- Pluto-type Communities aren't all bad
- **The Great Escape** (book/movie) details the underground community of British, British Commonwealth, and American POWs in WWII who secretly organized and executed an elaborate escape from a Nazi POW camp in Poland
 - “Big X” was the **PLUTO** leader, South African Roger Bushell
 - Many **MAKEMAKE** types were needed to invent ingenious escape plans and disguises, and **VARUNA** types for forged documents
 - Participants given “new rule”: never say word “Tunnel”; rather required to refer to 3 tunnels by names “Tom,” “Dick,” and “Harry.”
 - Some community members were **IXION** types – could not wait for tunnels, so were allowed to try other escapes
- Also the French Underground and anti-Communist groups
- Good All/Good Pluto community: Local Law Enforcement, a country's own Military, National Guard

For Clarity of Presentation...

- More planets mean more points in the chart – and that could create initial confusion
- Astrologers want to see the wheel, so we'll show the wheel
- But someday we will need to tell Others about this stuff
 - We need to take a page from the DNA folks: SIMPLICITY
 - So in addition to the Wheel, you will see the Diagram
- Simplicity also means we can't show everything, but must present enough to make sense
- Johannes Kepler's ideal: the Angles between Planets
- Kepler wanted to root everything out of Astrology except angular relationship, including Zodiac signs (but you need them and degrees to show and compare position)
- Kepler may have the key to bringing Astrology to a wider audience

Are Angles Enough?

- YES, by using planetary bodies ~1000 km or larger (there aren't many), you have enough naturally-occurring points!
- You can even restrict yourself to the most prominent angles, meaning conjunctions and multiples of 2 and 3.
- The conjunction plus angles that divide the circle by 2 or 3 are the most obvious actors in a chart. You definitely feel them in transit and progression.
- These angles show up reliably in great success and terrible crime, the two fascinating polarities of human experience
 - Someone who criminally kills will have a transiting/progressed conjunction or 2-series angle (opposition, square, semi-square, or sesquiquadrate) with a large planetary body
 - Someone who wins a Nobel Prize will have a tr./pr. conjunction or 3-series angle (trine or sextile) with a large planetary body

The diagram illustrates four Haumea-type configurations, each represented by a circle with a central dot and a pink letter 'H'. The configurations are:

- Elizabeth Barrett Browning:** 15♄ 15♃. The circle is on the left, and the 'H' is on the right. A curved line connects the bottom of the circle to the bottom of the 'H'.
- Emily Dickinson:** 19♃ 18♄. The 'H' is on the left, and the circle is on the right. A curved line connects the bottom of the 'H' to the bottom of the circle.
- M.C. Escher:** 26♄. The 'H' is on the left, and the circle is on the right. The 'H' and circle are positioned side-by-side.
- Copernicus:** 10♄. The circle is at the top, and the 'H' is at the bottom. A curved line connects the bottom of the circle to the top of the 'H'.

Each configuration is labeled with its corresponding name in blue text below the diagram.

Eris: A Pair with Pluto

- Eris's orbit is roughly twice the length of Pluto's, which makes it a natural "pair" (similar to the other two pairs in the outer solar system, Jupiter/Saturn and Uranus/Neptune)
- Where Pluto is the power and will of the Individual, Eris is The Other, the Alien, the Outcast, and in a wider sense, "Everyone Else."
- Only Eris can neutralize negative Pluto – the cohesive power of Others versus the self-involved Individual.

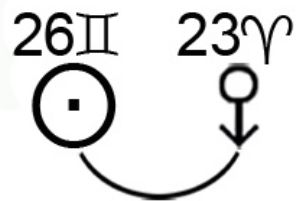

Eris can be Anti-Social

MORE PLUTOS Explains More

- In my book *MORE PLUTOS*, each of these large Kuiper planets is described using a wealth of celebrities, historical figures, and famous events as examples
- At a time where we are more keenly aware of the more chaotic, fringe members of our society, we need to be aware of their corresponding planets, not just Pluto but Haumea, Eris, Makemake, Sedna, and these few others

Thank You!
